COMPANY PROFILE

Where we come from

Introduction

Throughout the last ten years of webfact's widespread activities in the international multimedia markets our clients need for integrated project management and business consultancy grew steadily. This was the starting point for webfactVentures. Since its establishment in March 2007 Ventures realized a considerable track record and is steadily expanding its activities.

What we do

The Essence

webfactVentures and its sub-divisions constitute a powerful partner for multiple protagonists in the international web-based Start-Up and Investor Scene. Our main approach is to bring together unique ideas with everything they need to become reality.

In brief webfactVentures...

- Specializes in multimedia ventures and realizes their development
- Establishes online-based co-operation models with multiple partners
- Offers business opportunities for innovative Start-Ups, investors and media corporations

Our focus

Activity Fields

Being focused on Europe and the U.S. as key-markets webfactVentures always focuses on internationally thought business ideas. We are convinced that in today's web-business, a fast globalization is the most important tool to guarantee substantial growth and success. Our global approach therefore always is to expand the international outreach of our projects. As a company coming from the heart of Europe (Berlin) the main target of our **Headquarters** is to bring promising Start-Ups and ideas from Europe to the U.S.. In order to get access to what happens on the U.S. market, webfactVentures' San Francisco based **U.S. Satellite** constantly scans the local Start-Up Scene for Ideas with the ability of an international breakthrough.

Sub-Divisions

Giving Start-Ups everything they need to succeed is not limited to the funding stage – it has to be an ongoing process. With this awareness in mind webfactVentures established a structure which offers Start-Ups and also existing companies a full-service package: "**Incubate**". The services of this webfactVentures sub-division include all crucial elements and facilities like office space, legal & financial consultancy and many other things like access to webfacts network which lets the people behind the idea enough space to do what they are best at: "Pushing their Ideas". Through its services Incubate is able to protect any investment and guarantees a maximum of security.

Because on one side making entrepreneurial dreams become reality is often linked to financial needs and on the other hand web investors are increasingly looking for ways to enhance the security of their investment, webfactVentures is currently setting up two closed investment **funds** combining these needs. More details on these funds will soon be announced.

Conclusion

webfactVentures has everything to set free synergies and make the web-business a more secure and at the same still fascinating environment.
