## OVERVIEW

### Online Event- Management

webfact has an Event-Management Tool that gives customers the chance to coordinate all events and the participants.

### CMS

The Systems allows Users to create events with all information such as date, city, time etc that are displayed in Google Maps. Afterwards, participants can be related to the event.

### Invitation Management

Via an online newsletter-system they are invited and have the chance to confirm their coming by signing in with a log-in and password given in the newsletter.

The System can be integrated in existing Webpages as Stand-Alone Version or as Part of a newly built Website. The System is always integrated in such a way, that there is an intelligent relation to the content of the Webpage.

### Modules

In order to coordinate an Event, a complex Content Management System is provided that has the following Modules:

- Frontend with Participants -Area and Registration
- Event-Detail Editing / Backend
- Participants Management
- Participants Confirm / not Confirm List with Editing
- XML / CSV Import for many Participants
- Log-In Area with Special Information for invited Participants
- Online Confirmation System

## BENEFITS
